Charger

Pet Pebbell

Getting to know your device

Pet Pebbell

What do the lights mean?

GSM LED--GREEN

Light shows a single flash rapidly every 3 seconds	The device is connected to GSM network
Light shows a double flash rapidly every 3 seconds	The device is registered to GPRS network
Light shows a slow flash every 3 seconds	The device is connecting to GSM network
Light Solid (not flashing)	No SIM Card detected

GPS LED--BLUE

Light shows a single flash rapidly every 3 seconds	The device has GPS positioning fix
Light shows a slow flash every 3 seconds (every 1 second on and 3 seconds off)	The device has no GPS fix
No flashing	GPS chip is sleeping

Low battery alarm

When device battery is lower than 20%, it will send a SMS alarm "BAT: LOW!" to all authorized numbers. If battery lowers than 15%, the blue light will flash rapidly to warn the user to charge the device as soon as possible.

Usages

The Pet Pebbell device is equipped with an internal rechargeable battery. The autonomy of the battery may vary depending on the GPS and GSM activity and the use of the device.

➢ When charging for the first time use, please fully charge the battery for around 3~4 hours, using the USB charger. Thus the maximum capacity and lifecycle of the battery is ensured

➢ When charging, the Blue LED will be on (solid). After fully charging, the Blue LED will go to Signal Mode.

Note that a wrong charger may damage the device. Use only the original Pebbell GPS charger.

Note that the ideal temperature range for charging is between +10° C and +30° C. The battery life might be shortened if charging the battery below or above those temperatures.

Switching the device on and off

➢ To turn on the device: Plug the device to a charging Micro USB cable.

  ➢ To get an initial location, use outdoors or near a window so the device may fix onto the satellites.

➢ To turn off the device: Send SMS: **OFF** to the device, after you hear the beep, the device is turned off.

Pet Pebbell

Configuration and Operation by SMS
1. To Set the Authorized Number
NOTE: It is not mandatory for all three of the authorized numbers to be set, however a minimum of one must always be set.

① 	Command: **A1**
Note: With no spaces in the text, case-insensitive.
Example: A1
➢ 	Using your mobile phone, send A1 to the phone number of the device, it will reply: ·Set mobile number 1 OK!
➢ 	To delete this number, you can send A0 to the tracker.

②Command: **B1**
Example: **B1**
➢ The device will reply: ·**Set mobile number 2 OK!**
➢ To delete this number, you can send **B0**

③Command: **C1**
Example: **C1**
➢ The device will reply: ·**Set mobile number 3 OK!**
➢ To delete this number, you can send **C0**

Pet Pebbell

2. Location request

2.1 Reply with coordinates and web link

Command: **loc**
➢ The device will reply "GPS Info! Time: xxxxx; Lat: xxxx; Lon: xxxx; Spd: xxxxx,
   Altitude:xxxx Bt: xxxmaps.google.com/maps?q=loc:48.148819,11.542348
➢ Click on the link then the location can be shown directly on Google Map on your
   mobile phone.
➢ Put coordinates to Google earth or Google maps. Click on search button, then you will
   find the position fixed.

3. Modify the Time zone
Note: the time must amounts be in 2 digits and at maximum 23 hours in value. "+" in the
"time zone" portion of the text indicates east. The symbol "-" in the "time zone"
indicates west.

Command: **TZ+ +00/-00**
Example:
➢ **Tz+02**, the system will add 2 hours based on the UTC time.
➢ **Tz-02**, the system will minus 2 hours based on the UTC time.
   ➢ UTC time has been set as default time.
